

A Local Non-Profit Gets a Remodeled Office at an Affordable Price

A nonprofit organization in Chicago needed a new look office that was modern, utilized color to incorporate the company's branding, and was at an affordable price to stay within their budget, so they partnered with Office Furniture Center to get exactly the office they wanted for less.

Office Furniture Center's space planning team worked closely with the nonprofit to understand exactly what their needs were. This included an office visit to get a feel for the aesthetic of the room as well as taking measurements to ensure the proper office layout.

Product utilized included refurbished Herman Miller Ethospace workstations with custom red and white panels that match their company colors. The seated privacy setup gives the office a more open feel and has resulted in a more productive, collaborative work atmosphere.

"Office Furniture Center helped us every step of the way. It was so much easier than I expected dealing with only one company for the entire process, and it cost much less than I expected, too. The result is a beautiful new office that successfully showcases our brand and that our staff is much more excited to work in!"

The final step was to get everything delivered and installed. Our partner company MAC Logistics delivered and completely installed the entire office smoothly and efficiently so that the nonprofit was able to finish its week with the old office and start its week in the new office with no disruptions to its activities.
