

## See How Office Furniture Center Completely Upgraded an Industrial Finishing Company's Workspace

When Able Electropolishing decided it was time to upgrade their space, they turned to Office Furniture Center to help them give them the solution they were looking at the price that didn't break the bank!

Office Furniture Center's furniture specialist and designer initially met with Able's CEO Tom Glass and his team to first understand their vision for their space, to discuss options for the existing furniture assets and they plan to making the new space happen. The OFC presented options for furniture to meet Able's budget and timing considerations as well as drawings on how the furniture would be laid out in the space. Able chose OFC's refurbished Ethospace frame and tile system using contemporary fabrics, laminates and color schemes to give them a modern, clean and open feel.

Over the course a weekend, OFC's MAC Relocations team came in and removed the old furniture assets, delivered and installed the new furniture pieces. On Monday morning, Able's staff was able to move into their new space and begin enjoying their furniture immediately.

Ask Office Furniture Center how we can help you transform your space while saving you money, time and heartburn – we are love this stuff!
