## THE STORY

---

### OBJECTIVE

Township High School District 214 needed office furniture for a temporary workspace set up for their administration staff while their primary offices were being renovated. They wanted to create a space that was functional, comfortable and attractive but didn't break the bank as the Superintendent and his administrative and educational staff would be occupying the space for up to a year. Facility managers also had little time to get the temporary space up and operational as renovation of their current space was slated to begin as soon as the school year was concluded.

### RESPONSE

District 214 Leaders (D214) reached out to Office Furniture Center (OFC) having heard of their on-going decommissioning of a 1.8MM sq ft multi-building corporate campus in the north suburbs, not far from their home base. Upon visiting the job site, they were convinced that the high-quality Steelcase furniture coming off the site would work perfectly for their temporary space. Working with OFC's sales rep and design team, in less than two weeks, a space plan was finalized, furniture was selected, and contract was in place to get the work done.

### RESULTS

Within four weeks of contract award, the entire multi-floor facility serving as D214's temporary offices was furnished and ready to occupy. OFC's MAC Relocations (MAC) labor services division was used to deliver and install the furniture over a two-week period. The final configuration of furniture included over 70 Steelcase Answer workstations, 10 private offices, three conference rooms, collaboration areas, break room and associated task, guest and conference seating. D214 administration leaders and Board of Education members were equally impressed with how well the project came together, the professionalism working with OFC and MAC teams and the resulting value they were getting by using repurposed contract-grade office furniture.
