AIS, Friant, and Enwork

THE STORY

OBJECTIVE

This office renovation aimed to create a clean, streamlined workspace that prioritizes sustainability and modern design. By incorporating refurbished workstations and focusing on a minimalist aesthetic, the project aimed to enhance both the functionality and the visual appeal of the office environment, catering to the evolving needs of a rapidly growing company.

DESIGN SOLUTION

Our renovation leveraged high-quality, refurbished materials for an eco-friendly and modern workspace. Customized white HM Ethos workstations with orange accents and pale stone panels were used alongside versatile, movable furniture in the café area for adaptability. Private offices featured cost-effective AIS Phantom Pearl desks and Friant Zone Too chairs, while stylish Enwork tables supported local products. The reception boasts a modern stack-on desk, establishing a professional ambiance.

DESIRED OUTCOME

The renovated office successfully combines functionality with style, creating a workspace that is both inviting and efficient. The use of refurbished and locally sourced materials not only supports sustainability but also contributes to the local economy. The thoughtful design elements ensure that the space is adaptable, ready to accommodate future growth and changes. With the project completed by the early November deadline, the company now enjoys a workspace that truly reflects its dynamic and forward-thinking ethos, poised for continued expansion and success.
